Damascus, Syria
www.kaggle.com/zainmhesn

Summary

AI Engineer with practical experience in machine learning, NLP, and intelligent system development, including LLM-based applications and retrieval-augmented systems. Skilled in building end-to-end AI solutions, from data processing and model development to scalable deployment using modern frameworks and APIs. Developed real-world projects involving hybrid search, ranking models, and automation pipelines. Passionate about bridging the gap between research and production-ready AI systems.

Education

Damascus University | B.Sc. in Information Technology (Artificial Intelligence)
Graduation Project: RAG-based HR CV analysis system (score: 90)

Damascus, Syria | 2019 - 2025

Technical Skills

- AI & Machine Learning: Machine Learning, Deep Learning (CNNs), NLP (RAG, LLMs), Computer Vision, NLI.
- Retrieval & Search Systems: Hybrid Search, BM25, E5 Embeddings, Cross-Encoders, Semantic Search.
- Data & ML Engineering: Data Preprocessing, Data Mining, Data Ingestion, Automation Pipelines, Model Evaluation.
- Programming & Frameworks: Python, C#, FastAPI, PyTorch, TensorFlow, Hugging Face, LangChain.
- MLOps & Deployment: Docker, Docker Compose, Model Deployment, API Integration.
- Databases & Storage: PostgreSQL, Vector Databases.
- Other: Unity, Webots, Flutter, REST APIs, Webhooks, Prompt Engineering, n8n.

Work experience

East Med | Flutter Developer (On-site)

Damascus, Syria | 09. 2024 - Current

- Developed and maintained Flutter mobile applications integrated with RESTful APIs, supporting scalable mobile solutions.
- Designed and implemented PL/SQL backend logic to support data operations and mobile system workflows.
- Contributed to an AI-powered conversational system using Retrieval-Augmented Generation (RAG) and LLMs to assist with insurance-related queries.
- Contributed to the development and testing of RAG-based solutions as part of internal AI training and applied projects.

Learn For You | Flutter Developer | Remote

Daraa, Syria | 08.2024 - 05.2025

- Contributed to multiple Flutter applications including e-commerce and educational platforms with 1,000+ downloads
- Enhanced UI/UX, application performance, and monetization outcomes through targeted design improvements and Ad integration

Freelance Flutter Developer | Self-Employed

Damascus, Syria | 01.2023 - Current

- Delivered multiple production-ready Flutter applications from initial concept to release for clients across diverse domains
- Managed the full mobile development lifecycle including architecture design, UI implementation, backend integration, testing, and deployment
- Collaborated with remote teams and individual clients to meet delivery timelines while maintaining quality and functional requirements

Volunteer & Open-Source Experience

Itqan Community | Flutter Developer | Open-Source Contributor

- Contributed to a Flutter-based open-source project (Mushaf Imad), improving features and overall application performance.
- Resolved GitHub issues and enhanced code quality through structured refactoring and best practices.
- Applied unit testing and widget testing in Flutter to validate functionality and ensure UI stability.
- Collaborated using Git workflows, including branching strategies, pull requests, and code reviews.

Unblock Syria | Website Testing Supervisor

- lead website testing activities and prepare periodic reports on restricted digital services in Syria.
- Document service accessibility issues and contribute to transparency reporting.

Projects

Intelligent HR Resume Ranking System | AI Developer

2026

An AI-powered system that automates resume evaluation using RAG and LLMs. Developed a hybrid retrieval pipeline (BM25 + E5) with Cross-Encoder reranking, achieving 85% accuracy and 0.74 Spearman correlation for candidate ranking. Features interactive NLP querying for recruiters.

AI Insurance Assistant | Flutter Developer — AI Project Contributor (East Med)

2026

Contributed to the development of an intelligent conversational RAG system for insurance-related queries. The system processes complex documents, including product coverage, policy exclusions, and investment details, providing instant, context-aware answers to user inquiries. | Tech Stack: Python, LangChain, RAG, LLMs, Vector DBs.

Automated Job Intelligence System | Backend & Automation Developer

2026

Engineered a self-hosted automation pipeline using n8n and Docker to aggregate and filter real-time job postings from Telegram. The system employs rule-based filtering and conditional logic to evaluate message metadata, eliminating noise and routing high-relevance opportunities to targeted channels. | Tech Stack: n8n, Docker, Telegram Bot API, JavaScript, REST APIs.

Professional Development

Oracle SQL & APEX Training (80 Hours)	EastMed Company 8.2024 – 9.2024
AI & Machine Learning Training Program	SHAI (AI Club) 2024
ICPC Collegiate Programming Contest	Damascus University 2021

Soft skills

Analytical problem-solving • End-to-end ownership • Freelance project leadership • Cross-functional collaboration (remote & on-site) • High-performance under tight deadlines • Continuous learning & adaptability.
