Summary

Mobile Software Engineer specializing in Flutter, with 3+ years of experience building production-ready and enterprise mobile applications. Experienced in Clean Architecture, state management, REST API integration, local caching, secure storage, Firebase, and backend integration with Oracle SQL, PL/SQL, and ORDS. Academic background in Information Technology with a specialization in Artificial Intelligence, including hands-on experience with RAG, NLP, LLM-powered systems, and intelligent search. Experienced in delivering applications across the full development lifecycle, from architecture and implementation to optimization and production deployment.

Education

Damascus University | B.Sc. in Information Technology (Artificial Intelligence)

Damascus, Syria | 2019 - 2025

Graduation Project: RAG-based HR CV analysis system (score: 90)

Work experience

East Med | *Flutter Developer (On-site)*

Damascus, Syria | 09. 2024 - Current

- Develop and maintain an enterprise insurance mobile application designed as a commercial product for external clients.
- Own the mobile database schema and its supporting backend layer, including authentication, session management, mobile-specific data structures, and application workflows.
- Design and implement the REST services layer that exposes mobile APIs, integrating Oracle PL/SQL business procedures with the Flutter application.
- Build end-to-end mobile features across Flutter, REST APIs, and the database layer, with a focus on clean architecture, security, maintainability, and reliable data flow.

Learn For You | *Flutter Developer | Remote*

Daraa, Syria | 08.2024 - 05.2025

- Developed and maintained four Flutter applications, including projects built from scratch, major enhancements, and complete application rebuilds.
- Took end-to-end ownership of mobile application development, including feature implementation, backend integration, performance optimization, and production readiness.
- Built and evolved SKY Store with a WordPress-based backend, and improved Easy Dutch through performance, caching, UI/UX, and AdMob enhancements; both applications surpassed 1,000 downloads.
- Collaborated directly with backend developers to integrate APIs, resolve technical issues, and deliver complete application features.

Freelance Flutter Developer | *Self-Employed*

Damascus, Syria | 01.2023 - Current

- Delivered production-ready Flutter applications for clients across multiple domains.
- Managed projects end-to-end, from requirements and architecture to development, backend integration, and release preparation.
- Worked directly with clients to translate business requirements into reliable mobile solutions.

Volunteer & Open-Source Experience

Itqan Community | *Flutter Developer | Open-Source Contributor*

- Resolved bugs and improved code quality in Mushaf Imad, an open-source Flutter application.
- Developed unit and widget tests and contributed merged pull requests through GitHub.

Unblock Syria | *Volunteer*

- lead website testing activities and prepare periodic reports on restricted digital services in Syria.
- Document service accessibility issues and contribute to transparency reporting.

Technical skills

Flutter & Dart — Cross-platform Mobile Development, Responsive UI.

State Management & Architecture — BLoC/Cubit, Riverpod, Provider, Clean Architecture, SOLID, Dependency Injection.

Backend & APIs — REST API Design & Integration, Dio, Retrofit, Oracle ORDS, SQL, PL/SQL.

Storage & Security — Drift, Hive, SQLite, Secure Storage, Data Encryption, Authentication & Session Management.

Firebase & Integrations — Firebase Authentication, Firestore, FCM, Google Maps, Google Sign-In, AdMob, Payment Gateways.

Testing — Unit Testing, Widget Testing, Integration Testing.

AI & Machine Learning — NLP, RAG, LLM Integration, Vector Search, TensorFlow Lite.

Development Tools — Git, GitHub, GitLab, ZebTao.

Projects

Insurance Self-Service Mobile App: *Flutter Developer (East Med)*

2025 – Present

Developing a commercial Flutter application for insurance companies, enabling customers to manage policies, submit and track claims, explore insurance products, and complete E-KYC verification. Responsible for the mobile application, Oracle mobile database schema, authentication, and ORDS REST APIs.

Quran App: Flutter Developer (Technical Assessment)	2026
Developing an Islamic Flutter application with prayer times, location-based services, and radio streaming. Built using Clean Architecture with feature-based separation, BLoC, dependency injection, localization, and REST API integration.	
Sampler Voice Changer: Freelance Flutter Developer	2026
Developed a Flutter audio-processing application for modifying sampler audio, featuring BPM detection, speed and pitch adjustment, audio splitting, and MP3 export. Integrated FFmpeg, FFI, isolates, and custom PCM audio processing for performance-intensive operations.	
Car Showroom: Freelance Flutter Developer	2025 - 2026
Developed a Flutter application for car dealership management, featuring vehicle inventory, VIN scanning, sales tracking, deposit management, role-based access, and Excel/PDF reporting. Contributed to its iOS release for active clients.	
Jabal Al Yaman: Freelance Flutter Developer	2025 - 2026
Built and published a Flutter application from scratch for an international shipping company, enabling customers to manage and track shipments from China to Iraq through backend integration.	
SKY Store: Flutter Developer (Learn for You)	2025
Developed an e-commerce Flutter application integrated with a WordPress backend. The application surpassed 1,000 downloads on Google Play.	
Bankid.SY: Freelance Flutter Developer	2025
Developed a security-focused Flutter application featuring data encryption, secure local storage, and protected backend communication.	
Easy Dutch: Flutter Developer (Learn for You)	2024
Enhanced a language-learning application through performance optimization, improved caching, UI/UX redesign, and AdMob integration. Surpassed 1,000 downloads.	
VIP Organ Sets / Organ Sets 2024: Flutter Developer	2024
Improved the UI, performance, and stability of two music applications through interface redesign, optimization, and bug fixes.	
CarX: Freelance Flutter Developer	2024
Developed an automotive service platform featuring AI-powered maintenance recommendations using TensorFlow Lite, Google Maps integration, and Stripe payments.	
Tafadal: Flutter Developer (Logic Code)	2023
Developed a tourist taxi-booking application with booking management, real-time interactions, and on-demand transportation features.	
Loujen: Flutter Developer (Logic Code)	2023
Redesigned and enhanced the application's UI to improve usability, visual consistency, and user experience.	
Tekrum / Tekrum Partner: Freelance Flutter Developer	2023
Developed two Flutter applications from scratch for local services, managing implementation, testing, and Google Play publishing.	

Professional Development & Certificates

The Complete 2022 Flutter & Dart Development Course	Udemy 2021
The Complete Flutter Development Bootcamp with Dart	Udemy 2021
Oracle SQL & APEX Training (80 Hours)	EastMed Company 8.2024 – 9.2024
AI & Machine Learning Training Program	SHAI (AI Club) 2024
ICPC Collegiate Programming Contest	Damascus University 2021

Soft skills

Analytical problem-solving • End-to-end ownership • Freelance project leadership • Cross-functional collaboration (remote & on-site) • High-performance under tight deadlines • Continuous learning & adaptability.
